

Kangaroo Luxe

winther®

Technically Advanced Safety

Kangaroo Luxe is developed with safety in mind. To ensure optimal protection Kangaroo Luxe is equipped with hydraulic disc brakes, reinforced front frame, shock absorbing cabin base and safety bars. The strong aluminium safety bars do not only hold the cabin cover - they also offer protection over the child's head in case of a collision. All Winther cargo bikes offer 5-point safety harnesses, seats with neck support for additional protection and visible reflectors on wheels, frame, cabin base and hood top. Enjoy the ride.

ANTI-THEFT

Each bike has its own unique and visible frame number.

THOUGHT-THROUGH IN EVERY DETAIL

The reclining mesh seat makes it comfortable to take a nap on the way home and can be set to face the adult. The sunroof and side windows give extra ventilation and make it convenient when wanting to keep eye contact with the children. Behind the seats, there is plenty of room for storage, so you avoid overcrowding the cabin. To personalize your kangaroo Luxe, we offer a number plate where e.g. the family name can be placed.

Kangaroo Luxe

DANISH CRAFTSMANSHIP SINCE 1932

At Winther Bikes we ensure safe, comfortable and durable transportation for families around the world. All Winther cargo bikes are built by hand at our premises in Denmark. Each bike is delivered 100% assembled and taken for a test ride before dispatch to gain the highest level of inspection and quality control. We use carefully selected components so that you will have a cargo bike with a long lifespan and a minimum of maintenance.

ACCESSORIZE IT

Do you need a baby seat? Toddler seat cushion, storage pockets in the cabin, a rain cover or insect net? If so, go online and check out all accessories on wintherbikes.com

INDIVIDUALLY TAILORED COMFORT

Kangaroo Luxe is designed for optimal transportation of children, considering both their comfort as well as the riders. It offers great road-holding qualities due to the light weight torsionally rigid aluminum frame, in combination with the torsion suspension. The torsion suspension on the front wheels repels bumps and makes the ride extra comfortable for the children in the cabin. The spacious cabin offers plenty of room for the children and the low entry point makes it is easy for little ones to enter and exit the cabin themselves. A kickstand at the front ensures added stability when parked. The handlebar is multi-adjustable and a quick releasesaddle post ensure the optimal ergonomic riding position.

SINCE 1932

A FAMILY'S BEST FRIEND

We strive to make the most optimal cargo bikes that you as a family can trust – every day. Our bikes are long-lasting and offer a sustainable transportation solution based on innovative design – so you can focus on all the other important things in life.
